

COP 4600 Operating Systems - Homework 0

Johnny Li, N/A

Kadash12@ufl.edu - OK to share.

Programming background:

Strong with the languages: Java

Moderate with the languages: C++, MATLAB, Assembly

Weak with the languages: Mathematica, C (used briefly and have a beginner/fundamental grasp of it)

Familiarity with Unix, Linux: Used briefly and have a fundamental grasp of its commands and features.

I have taken both Digital Logic and Microprocessors already. I have already taken Computer Organization.

About myself: I am currently an undergraduate senior majoring in computer engineering and minoring in mathematics. I have worked in various fields including the restaurants and hospitality, computer networking, and software engineering. I am interested in the hardware aspect of computers but have worked on projects that focus on computers and network security and I prefer a hands-on approach when addressing any problems. I have a passion for world-building games, like Minecraft or Civilization, and miniature figurines from war staging models to Dungeon and Dragons playsets.
